EDUCATION

Ain Shams University

Bachelor of Computer and Information Sciences

- CGPA: 3.586/4.0

Cairo, Egypt

October 2022 – August 2026

PROJECTS & EXPERIENCE

Meen M3aya – Speaker Identification | C#

Mar 2025 – May 2025

- Implemented voice matching utilizing Dynamic Time Warping (DTW) to identify and compare speakers.
- Optimized memory usage by reusing data structures, reducing memory consumption by over 80% during audio comparisons.
- Achieved the lowest execution time compared to 25+ teams in the course project.

FOS – Educational Operating System | C, Assembly, QEMU

Oct 2024 – Apr 2025

- Implemented core kernel features including a first-fit allocator, sleeplocks, and semaphores, covering 25% of memory management and synchronization logic.
- Extended OS functionality with a multistage bootloader, VESA graphics and mouse input.

acmASCIS Training Portal | React, Node.js

Sep 2024 – Nov 2024

- Developed a prototype training portal for 200+ trainees, featuring automated progress tracking and feedback collection.
- Designed a mentoring dashboard and announcement feed to streamline instructor–student communication.

Mr. Bullet-Inspired Game | C++, SFML

May 2023 – Jul 2023

- Collaborated with a 5-member team to redesign core physics and mechanics, reducing collision bugs by 40%.
- Introduced level progression with 15+ stages and adaptive difficulty, increasing player engagement during testing sessions.

SKILLS

Programming Languages: C++, Java, C#, JavaScript, TypeScript, Scala, Python

Frameworks: React, Express.js, Flask

Tools: Git/GitHub, HTML/CSS, SQL

Languages: Arabic (Native), English (Fluent)

ACHIEVEMENTS

- Ranked 1st in CyberusStud Summer Training (2024) out of 50+ teams for building a secure game store website.
- Recognized as Most Valuable Team among 150+ teams for adding graphical support in the FOS project.
- Solved 850+ problems on Codeforces, actively participating in competitive programming.

EXTRACURRICULAR ACTIVITIES

acmASCIS Student Chapter

Training Committee Member

October 2025 – Present

- Deliver sessions on algorithms and data structures to help trainees prepare for competitive programming contests.
- Collaborate in setting and testing problems for internal contests and ECPC training rounds.

Support ASU

Game Development Committee Vice Head

September 2023 – October 2025

- Led and mentored the Game Development Committee, organizing workshops and game jams focused on SFML and C++.
- Conducted regular C++ coding sessions to mentor and upskill committee members in core programming and problem solving.
