Rateemah – .Net Developer

Feb 2023 – Aug 2023

Onsite

Project: **TRAOF Platform**

- Developed charitable organization management system (Traof project)
- Built donation management and beneficiary tracking systems
- Implemented web-based solutions for NGO operations

SKILLS

language	C#, ASP.NET Core, ASP.NET Core MVC, Entity Framework, Angular, HTML, JavaScript, jQuery, Bootstrap, JavaScript SQL Server
Architecture	CQRS, MediatR, Microservices, Repository Pattern
Integration	REST APIs, RabbitMQ, MassTransit
Performance	Redis, Dapper, Hangfire, Response Optimization
Enterprise	JWT Security
DevOps	Docker, Git, Serilog, AutoMapper

Certificates

- **.NET Backend Bootcamp – Upskilling Egypt** Comprehensive training in enterprise .NET development focusing on Clean Architecture, CQRS, MediatR, and scalable system design patterns. Gained hands-on experience with Redis caching, JWT security, Hangfire background jobs, RabbitMQ messaging, performance optimization, and advanced logging techniques.
- **.Net Intern** – Algoriza Egypt
Received hands-on training in ASP.NET Core, Clean Architecture, and RESTful APIs. Worked on real-world tasks such as API development and applying SOLID principles. Collaborated with a team using GitHub Projects and Agile methodologies.

Projects

SmartOne ERP - Electronics Sales & Installment Management System

Role: Full-Stack Development **Technologies:** ASP.NET Core, Entity Framework, SQL Server
Built retail ERP system with dual-mode sales processing, automated installment calculations, inventory management, and multi-location warehouse operations with comprehensive financial reporting.

TRAOF Platform - Charitable Organization Management System

Role: Backend Development **Technologies:** ASP.NET Core, Entity Framework, SQL Server, JWT
Developed comprehensive platform for donation processing, beneficiary management, and sponsorship matching with secure payment integration, role-based authentication, and real-time analytics dashboard.

Smart Home Management System

Role: Backend Development **Technologies:** ASP.NET Core, Entity Framework, SQL Server, IoT
Created intelligent automation platform with real-time device control, security monitoring, energy management, and mobile API integration for remote home management.

Education

Faculty of Technology, Modern Electrical Power Dept.
2017 – 2019
