EDUCATION

Bachelor of Computer Science, Ain Shams University 2022 – 2026 (Expected)
Related Courses: Analysis & Design of Algorithms, Data Structures, Database Management Systems, Object-Oriented Programming, Artificial Intelligence, NLP, Probability and Statistics, Network.
CGPA: 3.29/4.0

EXPERIENCE

Artificial Intelligence Trainee at Orange Digital Center | [GitHub Repository](#) Jan 2025 – Feb 2025

- Completed Level 3 AI course with **96%**, receiving professional evaluations and feedback.
- Built and deployed AI models using **RNNs, CNNs, NLP, GANs, VAEs**, and applied **MLOps** for pipeline automation and optimization.

PROJECTS

Steam Video Game Sales Analytics | *Web Scraping, FastAPI, React.js* | [link](#) April 2025 – May 2025

- Built a full-stack analytics platform with a FastAPI backend and React.js frontend to predict game sales, integrating scraped Steam data for enhanced feature engineering.

Pen to Pill (P2P) | *YOLOv8, TrOCR, mBART, FastAPI, React.js, Python* | [link](#) Mar 2025 – May 2025

- Built an AI system to digitize handwritten multilingual prescriptions using YOLOv8 for detection, TrOCR for recognition, and mBART for structuring text into (medicine, dosage) pairs.
- Developed a React.js frontend and FastAPI backend for real-time prescription upload and processing.

Cosmic Twin | *React.js, Node.js, Flask, Llama AI, Docker* | [link](#) Sept 2024 – Oct 2024

- Created a NASA-recognized platform with a Planet Personality Test and Llama-based chatbot to simplify exoplanet data.
- Integrated NASA datasets and delivered seamless UX using React.js and Flask.

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, SQL

Frameworks & Tools: FastAPI, Flask, Streamlit, Node.js, Git, Docker

Machine Learning & AI: LLMs, RAG, Scikit-learn, TensorFlow, PyTorch, YOLOv8, TrOCR, mBART, LLaMA, NLTK

ACHIEVEMENTS

- 2nd Place, Summit Machathon 6.0 (AI Competition):** Developed *Pen to Pill*, an AI system for digitizing multilingual prescriptions. [Certificate](#)
- 3rd Place, SATC-4, ICMTC 2024:** Contributed to resource mapping using STK software, AI detection, and satellite-ground communication. [Certificate](#)
- NASA Space Apps Hackathon:** Created *Cosmic Twin*, a personality-based exoplanet matching platform with a NASA chatbot. [Certificate](#)
- ECPC 2024 Qualifier:** Solved algorithmic problems using C++ and data structures. [Certificate](#)

EXTRACURRICULAR ACTIVITIES

- Open Source Community (OSC)** – Vice Head, Linux Committee (Oct 2023–Present): Led Linux workshops, taught Bash scripting, and achieved 98%+ feedback; trained in backend development.
- RoboTech** – Best AI Member: Presented ML concepts, supported workshops, and led an AI-Electrical integration project.
