SUMMARY

Fourth year senior computer science student, passionate about software engineering, problem solving, and building impactful technology through continuous learning and collaboration.

EDUCATION

Bachelor's Degree of Computer Science, Ain Shams University

Oct 2022 - June 2026

Year: Fourth, **CGPA:** 3.21/4.00

SKILLS

Programming Languages

C++, Java, C, Scala, Python

Computer Science Foundations

OOP, Data Structures, Algorithms, Database, Operating Systems

Tools and Technologies

Git, GitHub, JavaFX

EXPERIENCE

Software Testing Intern

July 2025 - July 2025

Giza Systems

New Cairo, Cairo, Egypt - [Certificate](#)

- Extensive hands-on experience in software testing including STLC, SDLC integration, and comprehensive testing methodologies across functional, non functional, and test automation.

PROJECTS

FOS, FCIS Operating System

[GitHub repository](#)

- Implemented custom memory allocation and page replacement techniques.
- Implemented Fault Handler and CPU scheduler.

Image Encryption and Compression

[GitHub repository](#)

- Image Encryption/Decryption: Using Linear Feedback Shift Register.
- Image Compression: Using Huffman encoding, improving image compression by 40%.
- Brute-Force Decryption.

FlyXpert - Flight Reservation System using JavaFx

[GitHub repository](#)

- Applied the four main principles of Object-Oriented Programming (encapsulation, inheritance, polymorphism, abstraction).
- Features: Sign Up/Sign In Functionality, Ticket Reservations, Seat Selection, Admin Mode.

CrystalNite - Metal Slug, Spin Off using SFML

[GitHub repository](#)

- Designed and implemented: Physics systems to replicate realistic movements and interactions by 90%, enhancing the overall gameplay experience.
- Developed core gameplay mechanics, focusing on user engagement and playability.

EXTRA-CURRICULAR ACTIVITIES

acmASCIS Student Chapter - Training Committee Member

Oct 2024 - Present

- Mentored 20+ first- and second-year students through on-site sessions on advanced data structures and algorithms and general problem solving techniques.

Support - Game Committee Member

Oct 2022 - July 2024

- Mentoring and supporting 1st year teams for their structured programming project using SFML C++ library.
- Conducted on-site sessions for first-year students on C++ fundamentals and the SFML library.

ACHIEVEMENTS

- ECPC 2025 Bronze Medalist, 15th place [Certificate](#)
- ECPC 2025 Qualification Day 5, 1st Place [Certificate](#)
- ECPC 2024, 18th place [Certificate](#)
- ECPC 2024 Qualification Day 5, 16th place [Certificate](#)
- 4th place in Faculty's Structured Programming Project 2023 Contest [Certificate](#)
- Solved 2500+ algorithmic problems on different platforms, achieved Candidate Master rank on codeforces.
