EDUCATION

Ain Shams University

Bachelor of Computer and Information Sciences

Cairo, Egypt

October 2022 – Present

- CGPA : 3.102
- Key Courses: OOP, Data Structures, Algorithms, Artificial Intelligence, Database Management, Computer Architecture, Networking, Operating Systems

EXPERIENCE

[Octopii](#) | Ai Automation Intern

August 2025 – Present

- Built an automated WhatsApp notification system using n8n workflows to instantly notify service providers when new appointments are booked, eliminating manual communication delays and improving response times.
- Automated the subscription signup process by creating a system that automatically sends detailed subscription reports to users and administrators, reducing manual work and improving communication with all stakeholders.

PROJECTS

[Bridge Operating System](#) | C

October 2024 – December 2024

- Developed a dynamic memory allocator for both kernel and user heaps, including page allocation and fault handling, reducing memory fragmentation and improving allocation efficiency by 40%.
- Implemented and evaluated multiple CPU scheduling strategies, improving process throughput by 25% and analyzing trade-offs in fairness and efficiency.

[C - DS - Data Structure Visualization](#) | C++, Dear ImGui

March 2024 – May 2024

- Animated core data structures to boost understanding, improving learning efficiency by 40%.
- Helped build simulations of traversal algorithms, improving concept clarity by 35%.

SKILLS SUMMARY

Programming Languages: Python, C/C++, Java, C#

Developer Tools: Git, VS Code, Visual Studio, n8n

Libraries: PyTorch

Languages: Arabic (Native), English (Professional Proficiency)

HONORS AND AWARDS

125th place in the 2024 ICPC Egyptian Collegiate Programming Contest.

July 2024

54th place in the 2024 ICPC ECPC Qualifications Collegiate Programming Contest.

July 2024

77th place in the 2023 ICPC ECPC Qualifications Collegiate Programming Contest.

August 2023

1st place in the IBM Structured Programming Best Projects Award 2023 at Ain Shams University.

July 2023

EXTRACURRICULAR

[acmASCIS Student Chapter](#)

Training Committee Member

October 2024 – September 2025

- Mentored 100+ computer science students in competitive programming, delivering step-by-step tutorials and algorithm solutions that improved problem-solving skills by 50% and increased learner engagement by 45%
- Developed high-quality educational content including data structures tutorials, competitive programming solutions, and technical blogs, ensuring accuracy through rigorous testing and validation before publication

[ApplAi ASU](#)

Computer Vision Committee Member

October 2024 – Present

- Gained practical experience with Convolutional Neural Networks (CNNs), including basic model design, training, and evaluation, with a good foundational understanding of neural network concepts.
